Ref: Cane Toad Report

## Visits took place this month -

Friday Night, September 6<sup>th</sup> into the 7<sup>th</sup> HALF

Friday Night, September 13<sup>th</sup> into the 14<sup>th</sup> FULL

Friday Night, September 27<sup>th</sup> into the 28<sup>th</sup> HALF

**Summary of Visit –** A thorough inspection of the HOA's common grounds (streets throughout Palmira) took place for the removal of the invasive Cane toads. There was an estimated count of 275 Cane toads removed throughout the month. The areas reported from Management and/or Owners have been checked well and we will keep on our radar for future visits. The rain and humid nights are making the Cane toads very active this time of year. We highly recommend that Owners keep lights off at night, or switch to bug lightbulbs. This will help keep the Cane toads from hanging out close to homes, under lights. Some of the catch for this month is pictured below. Native Southern Toads are present in this community as well, not all are Cane Toads. Invoice attached.
