Palmira Golf and Country Club - HOA  
C/O KEB Management Services  
6017 Pine Ridge Rd. #262  
Naples, FL 34119

Ref: Cane Toad Report – February 2025

### **Visits took place this month -**

Thursday Night, February 13th FULL

Friday Night, February 28th HALF

**Summary of Visit –** A thorough inspection of the HOA's common grounds (streets throughout Palmira) took place for the removal of the invasive Cane toads. There was an estimated count of 50 Cane toads removed throughout this month. The areas reported from Management and/or Owners have been checked well and we will keep on our radar for future visits. We highly recommend that Owners keep lights off at night, or switch to bug lightbulbs. This will help keep the Cane toads from hanging out close to homes, under lights. Some of the catch for this month is pictured below.

The colder weather is still present at night, which makes the Cane toads less active. We are expecting an active breeding season as soon as the weather warms up at night. Always, we will work with the CDD on tadpole removal visits. Please report to us right away when tadpoles start to emerge in lakes.

\*\*Native Southern Toads are present in this community as well, not all are Cane Toads. Invoice attached.

### **Upcoming Visits: The below dates are tentatively scheduled for the 205 year -**

Friday Night, March 7<sup>th</sup> FULL

Friday Night, March 14<sup>th</sup> HALF

Friday Night, March 28<sup>th</sup> HALF

Friday Night, April 4<sup>th</sup> HALF

Friday Night, April 11<sup>th</sup> FULL

Friday Night, April 25<sup>th</sup> HALF

Friday Night, May 2<sup>nd</sup> HALF

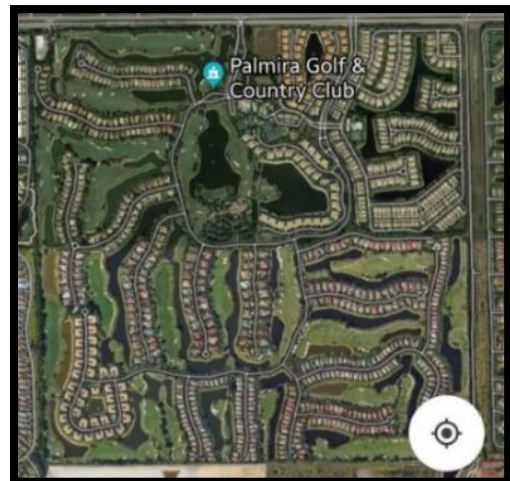

Friday Night, May 9<sup>th</sup> FULL

Friday Night, May 23<sup>rd</sup> HALF

Friday Night, June 6<sup>th</sup> HALF

Friday Night, June 13<sup>th</sup> FULL

Friday Night, June 27<sup>th</sup> HALF

Tuesday Night, November 25th HALF

### Identifying a Cane Toad

Remove the invasive species

One of the easiest ways to tell the Cane toad and Native toad apart is by looking on top of their head. The Southern toad, native to Florida, has a crest on top of their head. Think of the crest as a crown, and they should be treated as royalty. The toads with the crown can be left alone. The invasive Cane toad has a smooth head. They do not have the crest like the Southern toads.

Above Pictures: The top picture is a Southern toad, showing the crest on top of the head. The bottom picture is a Cane toad, showing the smooth head, no crest.
