Bonita Springs, FL 34135

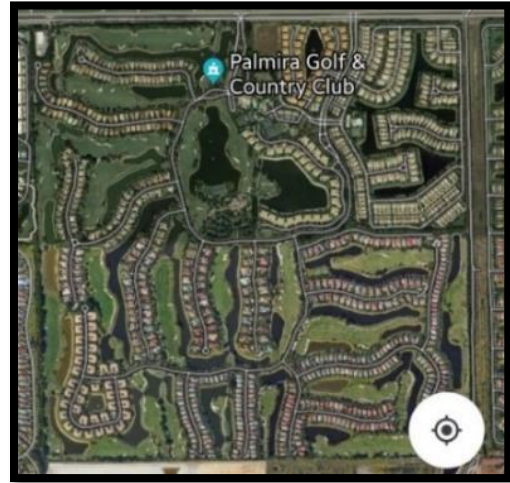

Ref: Cane Toad Report – August 2025

### Visits took place this month -

Friday Night, September 5th HALF

Friday Night, September 12th FULL

Friday Night, September 26th HALF

**Summary of Visit –** A thorough inspection of the HOA's common grounds (streets and amenity areas throughout Palmira) took place for the removal of the invasive Cane toads. There was an estimated count of 300 Cane toads removed throughout this month. The areas reported from Management and/or Owners have been checked well and we will keep on our radar for future visits. We highly recommend that Owners keep lights off at night, or switch to bug lightbulbs. This will help keep the Cane toads from hanging out close to homes, under lights. The warmer weather is here, which makes the Cane toads much more active. The rain will make them more active within the streets and yards, because they do not need the lake for their water source.

**\*\*Some Owners are reporting to us the treefrogs that sit at the front door, front walkway or on garage lights. These are treefrogs and not Cane toads. If anyone is not certain on what they are seeing, send us a picture and we can help to identify the species.**

**Treefrogs will be found on side of walls, Cane toads are found on the ground.**

**\*\*Native Southern Toads are present in this community as well; not all are Cane Toads. We remove the Cane toads only and will leave native species and tree frogs. Invoice attached. Picture below shows some of the catch for this month.**

### **Upcoming Visits: The below dates are tentatively scheduled for the 2025 year -**

Friday Night, October 3rd HALF

Friday Night, October 10th FULL

Friday Night, October 24th HALF

Friday Night, November 7th HALF

Friday Night, November 14th FULL

Tuesday Night, November 25th HALF
