Palmira Golf and Country Club - HOA
C/O May Management Services, Inc.
11100 Bonita Beach Rd., Suite 101
Bonita Springs, FL 34135

Ref: Cane Toad Report – April 2026

Visits took place this month -

Friday Night, April 3

Friday Night, April 10

Friday Night, April 24

Summary of Visit – A thorough inspection of the HOA's common grounds (streets and amenity areas throughout Palmira) took place for the removal of the invasive Cane toads. **There was an estimated count of 175-180 Cane toads removed throughout this month.** We highly recommend that Owners keep lights off at night, or switch to bug lightbulbs. This will help keep the Cane toads from hanging out close to homes, under lights.

**Some Owners are reporting to us the treefrogs that sit at the front door, front walkway or on garage lights. These are treefrogs and not Cane toads. If anyone is not certain on what they are seeing, send us a picture and we can help to identify the species. Treefrogs will be found on side of walls, Cane toads are found on the ground.

**Native Southern Toads are present in this community as well; not all are Cane Toads. We remove the Cane toads only and will leave native species and tree frogs.

During this time of year, the Cane toads are mostly found on the golf course around the lakes at night. The first round of breeding is here, but we are expecting the tadpoles to slow down. We have had many daytime visits already with the CDD to remove tadpoles in lakes. If tadpoles are reported, please let us know which lakes so we can schedule accordingly.

Although most of the toads are found on the water source this time of year, the rain is starting, and they can venture into the streets. We always recommend pet owners are vigilant when walking pets outside.

Invoice attached. Picture below shows some of the catch for this month.
